PROFESSIONAL SUMMARY

B.Sc. CSIT graduate (Mid-West University, CGPA 3.55/4.00) with a strong foundation in Data Science, Machine Learning, AI, and NLP. Completed the AI Fluency Internship Program and Machine Learning Internship Program at FlyRank.ai, gaining hands-on experience in data analysis, model development, evaluation, and AI-assisted workflows. Proficient in Python, SQL, scikit-learn, TensorFlow, and PyTorch, with portfolio projects spanning an end-to-end machine learning capstone, NLP-based sentiment analysis, and interactive data dashboards. Seeking an entry-level Data Scientist, Machine Learning Engineer/Intern, or Data Analyst role.

PROFESSIONAL EXPERIENCE

Machine Learning Intern — FlyRank.ai

Machine Learning Internship Program | Remote | 01 July 2026 – 11 September 2026

- Completed an end-to-end machine learning capstone to prioritize content for human review, using historical content-performance and content-freshness signals across a 30,000-record anonymized dataset.
- Performed data preparation, exploratory data analysis, and feature selection; built a rule-based baseline and developed a Random Forest model, evaluated using grouped-client validation.
- Raised F1-score from 0.0255 (baseline) to 0.7345 (precision 0.68, recall 0.80) under grouped-client validation, comparing the Random Forest model against the rule-based baseline.
- Documented methodology, results, and limitations — including observational/non-causal data, dataset-specific thresholds, and the human-in-the-loop decision context — in a research-style report published via GitHub Pages.

AI Fluency Intern — FlyRank.ai

AI Fluency Internship Program | Remote | 01 July 2026 – 09 September 2026

- Applied structured AI workflows to support research, technical documentation, and project development, integrating AI tools into a practical professional workflow.
- Produced project documentation, case-study write-ups, and demonstration materials to present technical work clearly.
- Practiced AI fluency techniques to support iterative technical learning and continuous project improvement.

SELECTED PROJECTS

ML Content Review Prioritization Capstone (FlyRank.ai)

Python, Pandas, NumPy, scikit-learn, Random Forest, Jupyter Notebook — see Professional Experience for methodology and results

- Research-style paper and full write-up covering data preparation, baseline vs. Random Forest comparison, grouped-client validation, and documented limitations.

Project paper: magar-bhuwan.github.io/ML-Internship-Assignments | GitHub: github.com/Magar-Bhuwan/ML-Internship-Assignments

IMDB Review Sentiment Analysis

Python, NumPy, Pandas, NLTK, Gensim Word2Vec, scikit-learn, SVM, Joblib, Streamlit

- Built an NLP-based sentiment analysis system for movie reviews using Word2Vec feature extraction and an SVM classifier to predict positive or negative sentiment.
- Deployed the model as an interactive Streamlit web application for live sentiment prediction.

Live demo: imdb-sentiment-analysis.streamlit.app

AI Job Trends Dashboard

Python, Pandas, Plotly, Streamlit

- Developed an interactive dashboard analyzing AI job trends from 2024–2030 across a dataset of approximately 30,000 rows spanning IT, manufacturing, finance, healthcare, education, entertainment, retail, and transportation.
- Used Plotly and Streamlit to deliver data-driven, interactive visual insights.

Medical Professional Assistant Chatbot

Python, Streamlit, LangChain, OpenAI, Firebase/Pyrebase4, SQLite

- Built a Streamlit-based AI chatbot using GPT-3.5 via LangChain, with Firebase authentication and SQLite for storing user accounts and chat history.

GitHub: github.com/Magar-Bhuwan/Medical-Professional-Assistant

PDF to Audiobook Converter

Python, Streamlit, PyPDF, gTTS

- Developed a Streamlit application that extracts text from PDF files and converts it into MP3 audio using gTTS.

GitHub: github.com/Magar-Bhuwan/PDF-to-AudioBook-Converter

TECHNICAL SKILLS

Programming: Python, SQL

Data Science: NumPy, Pandas, Matplotlib, Seaborn

Machine Learning: Scikit-learn, XGBoost, Regression, Classification, Clustering, Feature Engineering, Model Evaluation

Deep Learning: TensorFlow, Keras, PyTorch, Neural Networks, CNNs

NLP / AI: Natural Language Processing, Word2Vec, Sentiment Analysis, Text Classification

Tools: Jupyter Notebook, VS Code, Git, GitHub, Streamlit

Databases: MySQL, SQLite

Other: Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, Documentation

EDUCATION

B.Sc. CSIT

2021 – 2025

Mid-West University, Surkhet, Nepal

CGPA: 3.55/4.00

Final-Year Project: Medical Professional Assistant Chatbot
